DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 2, drawn to nucleic acid molecules comprising SEQ ID NO: 1 encoding the amino acid sequence of SEQ ID NO: 2, classified in class 536, subclass 23.5.
 - II. Claim 3, drawn to nucleic acid molecules encoding the amino acid sequence of SEQ ID NO: 4, classified in class 536, subclass 23.5.
 - III. Claim 4, drawn to nucleic acid molecules encoding the amino acid sequence of SEQ ID NO: 6, classified in class 536, subclass 23.5.
 - IV. Claim 5, drawn to nucleic acid molecules encoding the amino acid sequence of SEQ ID NO: 8, classified in class 536, subclass 23.5.
 - V. Claim 6, drawn to nucleic acid molecules encoding the amino acid sequence of SEQ ID NO: 10, classified in class 536, subclass 23.5.

The inventions are distinct, each from the other because of the following reasons:

2. Each of inventions 1-6 are unrelated to each other. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Although the classifications for these various nucleic acids are overlapping, each represents patentably distinct nucleic acids, each of which constitutes a patentably distinct product with distinct physical and functional characteristics. Further, the search for more than one product would be

Art Unit: 1646

burdensome, because they are not only claimed by nucleic acid sequence, but by the sequence of the protein encoded thereby, and requires a 'reverse translation' search of SEQ ID NOS: 2, 4, 6, 8 and 10, such that each individual sequence requires two sequence searches which are not required for any of the other sequences.

3. Because these inventions are distinct for the reasons given above and require separate sequence searches, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
